# imageRUNNER 1700 Series - Supplies

## 2-3-3-1 GPR-39 Drum Unit

The imageRUNNER 1700 Series drum yields are listed in the chart below. Uses compact E-Drum technology for longer life by using a special coating layer which is more resistant to wear and scratching than a traditional OPC drum.

<table>
<thead>
<tr>
<th>Drum Yield</th>
<th>imageRUNNER 1750/1755F</th>
<th>imageRUNNER 1740/1745F</th>
<th>imageRUNNER 1730/1735F</th>
</tr>
</thead>
<tbody>
<tr>
<td>impressions</td>
<td>110,000</td>
<td>102,000</td>
<td>67,000</td>
</tr>
</tbody>
</table>

All yields are estimated.

## 2-3-3-2 GPR-39 Black Toner

The imageRUNNER 1700 Series toner cartridge yields approx. 15,100 impressions @ 6% Coverage.

Enterprise Systems Product Management Division  Canon U.S.A., Inc.
Replacing the Toner

When only a small amount of toner is left inside the machine, the message "Prepare the tone" is displayed on the screen. Although you may continue printing, it is highly recommended that you prepare to install a new toner cartridge before the toner completely runs out.

When toner runs out completely and prints can no longer be made, the message "Replace the toner" appears on the touch panel display. Installing [Recover Later] enables you to continue operations. However, you have to replace the toner cartridge to make further prints.

Warning
- Do not burn or throw used toner cartridges into open flames, as this may cause the toner remaining inside the cartridges to ignite, resulting in burns or a fire.
- Do not store toner cartridges or paper in places exposed to open flames, as this may cause the toner or paper to ignite, resulting in burns or a fire.

Caution
- Keep toner out of the reach of small children. If toner is ingested, consult a physician immediately.
- Take care not to allow toner to come into contact with your hands or clothing. If toner gets onto your hands or clothing, wash it off immediately with cold water. Washing with warm water may set the toner permanently, making the stains impossible to remove.
- When discarding used toner cartridges, put the cartridges in a bag to prevent the toner remaining inside the cartridges from scattering, and dispose of them in a location away from open flames.

Important
- Use only toner cartridges intended for use with the machine. (See "Consumables," on p. 4–18.)
- Do not replace toner cartridges until the message prompting you to do so appears.
- Do not attempt to replace the toner cartridge while the machine is printing.

Note
If toner runs out during a print job, the remaining prints are completed after you replace the toner cartridge.

1. Open the front cover.

2. Turn the toner cartridge lock lever counterclockwise so that the arrow marks on the lever and its axis face each other.
3 Pull the toner cartridge out of the toner supply port.
Pull the toner cartridge out halfway with one hand, support it with the other hand from underneath, and then remove it completely while keeping it level.

**WARNING**
Do not burn or throw used toner cartridges into open flames, as this may ignite the toner remaining inside the cartridge, and result in burns or a fire.

4 Take the new toner cartridge out of the package and uncap it.

5 Insert the new toner cartridge in the toner supply port as far as it will go.
Support the new toner cartridge with one hand from underneath while pushing it into the machine with the other hand.

6 Turn the toner cartridge lock lever clockwise so that the arrow marks on the lever and its axis face each other.
Close the front cover.

**CAUTION**

When closing the cover, be careful not to get your fingers caught, as this may result in personal injury.
